

5 Cockroach Facts

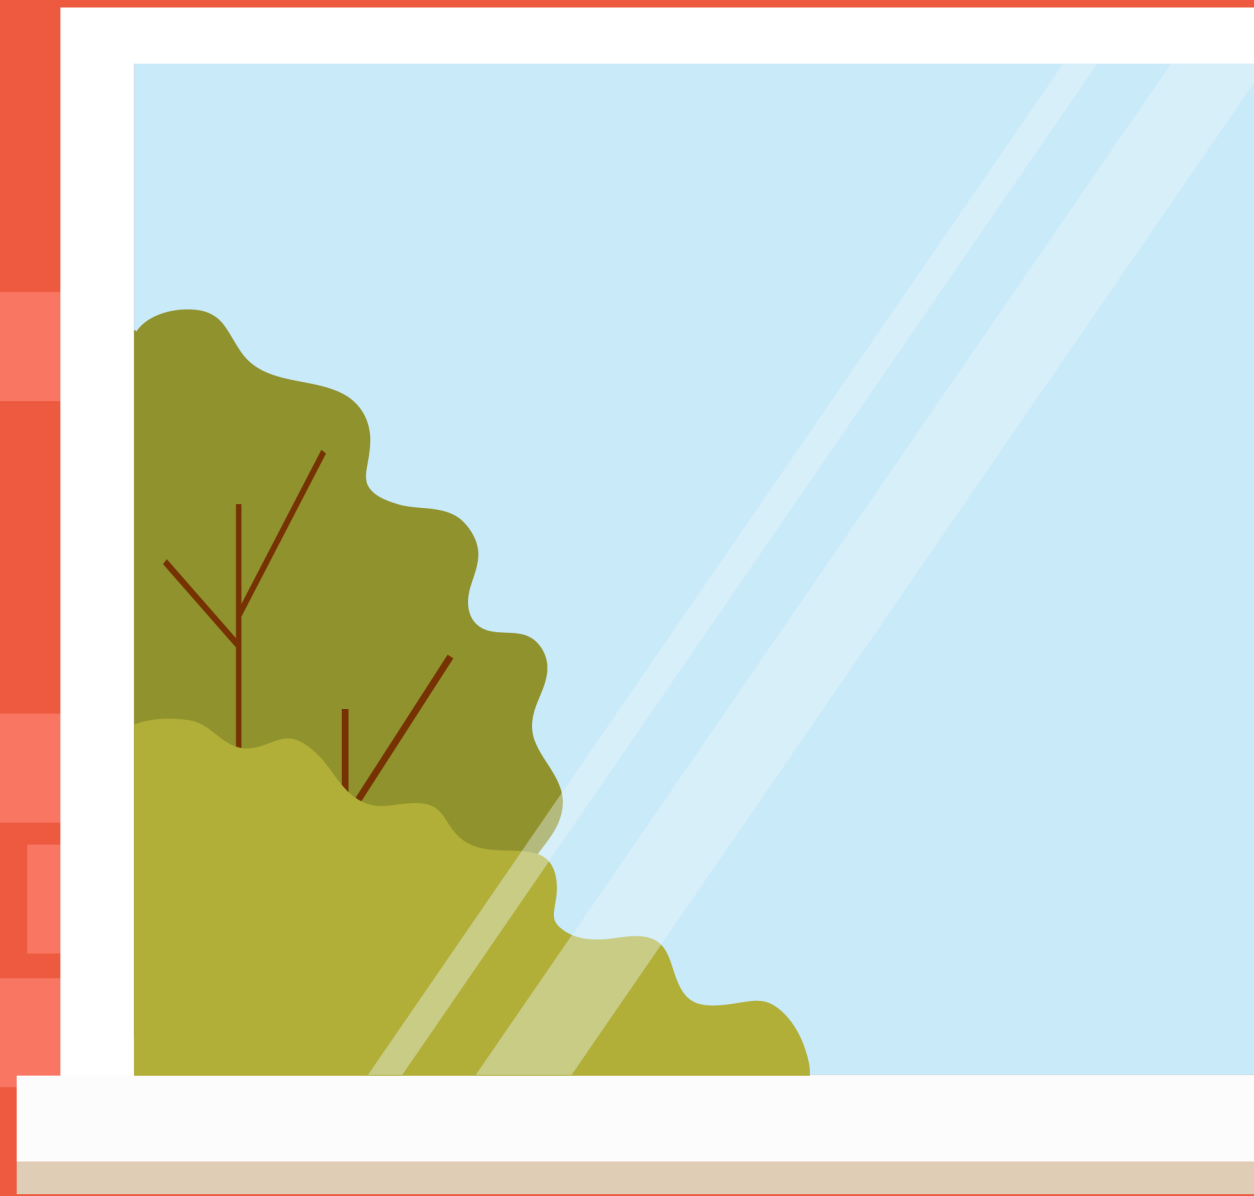

and how to keep them away

1

Cockroaches can squeeze through any gaps along your windows and doors due to their small and flat bodies.

Tip: Seal your windows and doors.

2

Moisture can cause walls to crack or form mold. These create the perfect entryway for cockroaches.

Tip: Seal and patch up the cracks in your walls.

3

Leaving food out for long periods can encourage a cockroach infestation to breakout.

Tip: Store your food in airtight containers.

4

Leftover food particles lying on kitchen counters and table tops can entice cockroaches.

Tip: Make sure to be thorough when cleaning.

5

Cockroaches love to hide in highly cluttered areas (eg: boxes and stacks of newspapers).

Tip: Regularly clean and keep your homes organised.
