

# ZIKA VIRUS

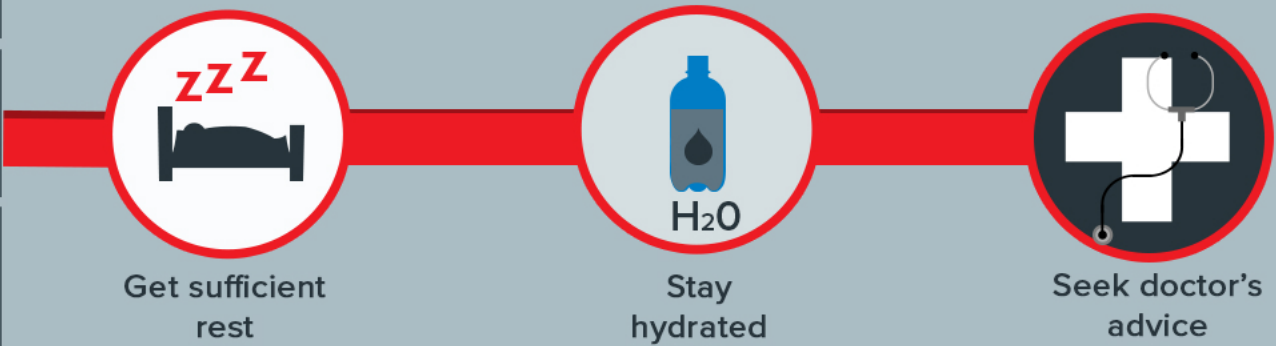

Zika virus has been spreading throughout the Central and South America since May 2015. Learn more about the virus and what can be done to protect you and your family from this dangerous virus.

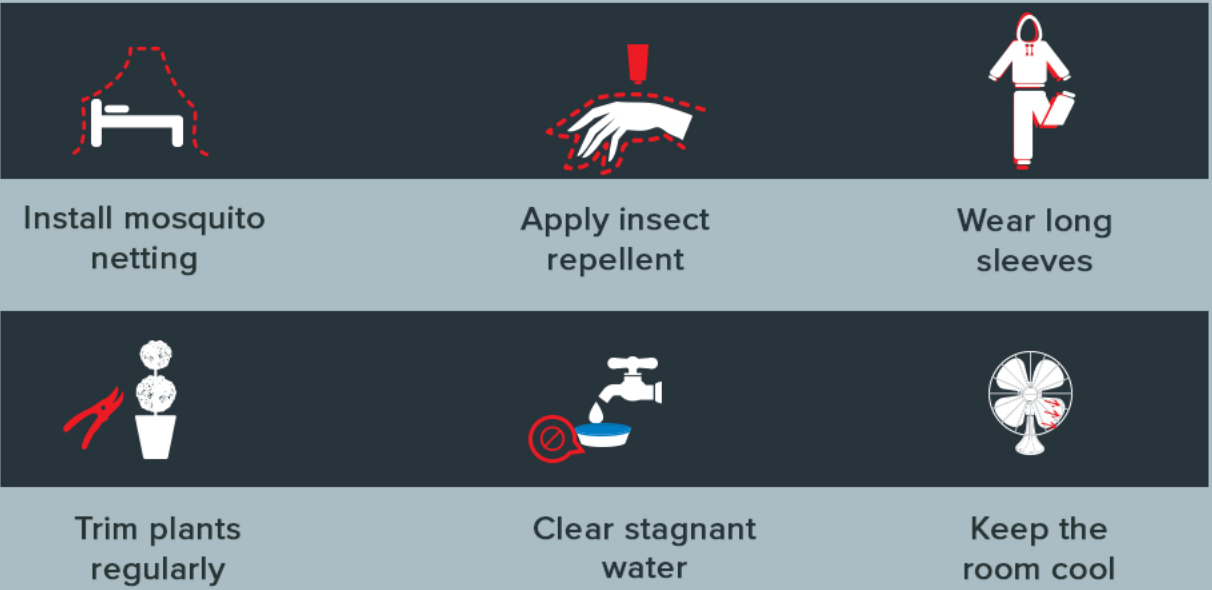

## Symptoms

## Treatments

## Prevention Tips

## Microcephaly

- To be caused by a failure of brain to grow at normal rate
- Results in below average head size
- Head circumference measuring less than 31.5-32 cm at birth

## Integrated Mosquito Management (IMM)

IMM is a programme which involves holistic solutions to fight against the *Aedes* mosquitoes targeted at each life cycle.

### Eggs

**Eliminate** mosquito breeding grounds (stagnant water) in your home

### Larva or Pupa

**Larvicide treatment** to control the development of mosquitoes' larvae on stagnant water

### Adult Mosquitoes

**Thermal fogging or ULV misting** effectively controls the population of adult *Aedes* mosquitoes

**Use adult mosquito traps** to further control the mosquito life cycle

## Timeline

At Rentokil, we are committed to protect your home and family from diseases like Zika virus infection and Dengue with safe mosquito control solutions.
